MANAGEMENT DISCUSSION AND ANALYSIS REPORT**a) Overview**

The company is now a diversified company with ship breaking, manufacture of sponge & iron, trading activities & investment activities. The company has also diversified into Manufacture of Industrial Gases, Real Estate and Construction by going into partnerships with experienced entrepreneurs in the field.

b) Segmental Review

During the financial year 2014-15, ship-breaking unit at Alang Ship Breaking Yard has not shown a growth, however, the ship breaking unit is expected to grow substantially in coming years. Due to fluctuating and volatile prices of old Ships, Iron and Steel products coupled with depreciation in value of Indian Rupee vis-à-vis US Dollar during the year, the net profit margins of this segment has been affected. The Trading Unit as well as Steel and Power Unit of the company have not performed well during the year. However, the management is of the view that, in the coming years the ship breaking industry will be stable and with expected boost in the economy the requirement of iron and steel will increase which will help the company to move towards its sustained path of growth.

1. Ship breaking:

As has been stated in the out-look, due to fluctuations in the exchange rate of US Dollar vis-à-vis Indian Rupee and steep decrease in prices of Iron and steel products and volatile market conditions. During the year company has achieved sales turnover of Rs. 14,070.72 Lacs as against 14938.77 Lacs last year. During the financial year 2014-15, ship-breaking unit at Alang Ship Breaking Yard has not shown a growth, however, the ship breaking unit is expected to grow substantially in coming years. Due to fluctuating and volatile prices of old Ships, Iron and Steel products coupled with depreciation in value of Indian Rupee vis-à-vis US Dollar during the year, the sales turnover of this segment has been affected. Though the year under review saw fluctuation in the international market of old ships coming for breaking, the management was very cautious and purchased ships at proper time and built a good level of inventories to earn better profits in coming years. Now the market has stabilized and taking into account the inventory level of the company as at the year end, it is hoped that the turnover and the profitability will show a an increase in the coming years.

2. Steel & Power:

As has been stated in the out-look, the performance of the sponge iron segment has not been as per the targets in terms of sales turnover and has achieved sales turnover of Rs. 11.81 Lacs. Various factors like difficulties in uninterrupted supply and availability of raw materials and other similar factors at its Hassan, Karnataka, fluctuating and volatile prices of Iron and Steel products during the year and also major depreciation in value of Indian Rupee vis-à-vis US Dollar has affected the sales turnover and net profit margin of the unit. Moreover, the business of the unit i.e. manufacturing of Sponge and Iron has been shut down during the period under review because of the various factors like difficulties in uninterrupted supply and availability of raw materials and other similar factors at its Hassan, Karnataka, fluctuating and volatile prices of Iron and Steel products during the year and also major depreciation in value of Indian Rupee vis-à-vis US Dollar.

3. Trading (HO-Mumbai):

During the financial year 2014-15, the trading unit has not performed well due to steep decrease in prices of Iron and steel products and volatile market conditions. The trading segment has achieved sales turnover of Rs. 1,102.39 Lacs as against Rs. 31,225.35 Lacs last year. The management is of the view that, in the coming years the iron and steel industry will be stable and with expected boost in the economy the requirement of iron and steel will increase which will help the company to move towards its sustained path of growth.

4. Trading (Bhavnagar):

During the financial year 2014-15, the company has started its trading unit in Bhavnagar as well. The unit has performed very well during the year under review. The trading unit at Bhavnagar has achieved sales turnover of Rs. 8,448.96 Lacs and earned profit of Rs. 290.47 Lacs for the financial year ended on 31st March, 2015. The management is of the view that, in the coming years the requirement of iron and steel will increase which will help the company to move towards its sustained path of growth.

5. Investments:

Investment is not main business of the company. As and when surplus funds are available with the company, the company lent the same with a view to earn interest and short term and long term capital gain. As stated in earlier paras of this annual report, the company has entered into partnership in various construction and real estate projects and has acquired a major share in such real estate investments. Such projects are expected to yield good profits to the company in short to medium term of periods.

f) Risk Management

The Company is exposed to the risk from the market fluctuations of foreign exchange as well as the fluctuation in the price of iron and steel. The Company's raw material is old ship, which is purchased from the international market on credit ranging up to 180 days to 360 days. The Company is adopting policy of full hedging or covering the foreign exchange requirement, the Company is regularly monitoring the foreign exchange movement and suitable remedial measures are taken as and when felt necessary.

Though the Company is employing such measures, the Company is still exposed to the risk of any heavy foreign exchange fluctuation.

Likewise the Company's finished products are mainly re-rollable scrap generated from ship breaking and the price of the same is linked to the market rate for iron and steel. Any up and down in the price of the iron and steel will affect the profitability of the Company. However taking into account, the price fluctuations already affected during the year 2014-15, further major down / upward trend in the price of iron and steel is not expected.

In addition to the above, the Company is also exposed to the risk of fluctuation in the real estate and construction and Redeveloping market as the Company has invested some of its surplus funds in partnership firm engaged in such business. However the Directors considering their past experience, is confident that the Company will not face any major set back in this area.

b) USE OF ESTIMATES

The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Examples of such estimates include provisions for doubtful receivables, employee benefits, provision for income taxes, the useful lives of depreciable fixed assets and provisions for impairment. Future results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognized in the period in which the results are known / materialize.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

c) FIXED ASSETS

Fixed Assets are stated at cost, less accumulated depreciation (other than 'Freehold Land' where no depreciation is charged) and impairment loss, if any. Cost comprises the purchase price, including duties and other non-refundable taxes or levies any directly attributable cost of bringing the asset to its working condition and indirect costs specifically attributable to construction of a project or to the acquisition of a fixed asset.

In the event of the same having been revalued, they are stated at the revalued figures.

Expenditures relating to fixed assets is added to costs only when the same involved modification work whereby it increases the life of the assets. In the event of the same having been revalued, they are stated at the revalued figures. Expenditure relating to fixed assets is added to costs only when the same involved modification work whereby it increases the life of the assets.

d) DEPRECIATION ON TANGIBLE ASSETS

- I In respect of fixed assets (other than freehold land and capital work-in-progress) acquired during the year, depreciation/ amortization is charged on a straight line basis so as to write off the cost of the assets over the useful lives as per the Companies Act, 2013 and for the assets acquired prior to April 1, 2014, the carrying amount as on April 1, 2014 is depreciated over the remaining useful life estimated by management as per the Companies Act, 2013 on the basis of evaluation.
- II No depreciation is provided for assets sold during the year whereas pro-rata depreciation is provided on assets acquired during the year.

e) IMPAIRMENT OF ASSTES

The management reviews periodically the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset.

Reversal of impairment loss is recognized as income in the statement of profit and loss.

f) BORROWING COSTS

Borrowing costs are recognized in the Statement of Profit and Loss except interest incurred on borrowings, specifically raised for projects are capitalized to the cost of the asset until such time that the asset is ready to be put to use for its intended purpose.

g) INVESTMENTS

Investments are either classified as current or long term based on Management's intentions:

- i) Current investment are carried at the lower of cost and fair market value.
- ii) Long term investments are carried at cost less provisions recorded to recognize any decline, other than temporary, in the carrying value of investments.

h) VALUATION OF INVENTORIES

Items of inventories are measured as :

- | | |
|-----------------------------|--|
| i) Ship Materials | At Cost |
| ii) Trading Goods in Trade | At Lower of cost or net realisable value |
| iii) Steel Raw Materials | At cost |
| iv) Steel Finished Products | At Lower of cost or net realisable value |

The weight of the ship purchased is accounted in terms of LDT of the ship at the time of its construction. Ascertaining of weight of ship at the time of purchase is not possible due to its nature and size. There is loss of weight on account of corrosion and other factors during the usage of the ship and its voyage for about 20 to 25 years

Inventory at the close of the year is ascertained by reducing the weight of the scrap sold together with the estimated wastage of the material.

As regards to consumable stores and spares, the same is treated as having been consumed in the year of purchase.

i) REVENUE RECOGNITION

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. Turnover include sale of goods, services, sales tax, service tax, excise duty and sales during trial run period, adjusted for discounts (net) , Value Added Tax and gain/loss corresponding hedge contracts.

Dividend income is recognized when right to receive is established. Interest income is recognized on time proportion basis taking into account the amount outstanding and rate applicable.

Share of profit/(Loss) from partnership firms for the year is accounted on the basis of provisional annual reports of the firms. Differential share of profit/(Loss), if any, from provisional and audited annual reports of the firms will be accounted in the next financial year.

j) FOREIGN CURRENCY TRANSACTIONS

Purchase in respect of materials are accounted for on actual payment basis if the same are made before the year end and/or at the rate of foreign exchange booking are made. In all other cases, the purchases and also the liability in respect of said foreign exchange are stated as converted at the exchange rate prevalent at the last day of the financial year.

k) PROVISION FOR TAXATION

Current Taxes

Provision for current tax is made in accordance with the provisions of Income Tax Act, 1961.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance taxes paid and TDS/TCS receivables.

Deferred Taxes

Deferred tax expense or benefit is recognized on timing differences being the differ-

ence between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. In other situations, deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available to realize these assets.

Minimum Alternative Tax (MAT)

Minimum Alternate Tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the statement of profit and loss and shown as MAT Credit Entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal Income Tax during the specified period.

l) RETIREMENT AND OTHER EMPLOYEE BENEFITS

Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due. The company has no obligation, other than the contribution payable to the provident fund.

The Management is also of the opinion that the payment of pension Act, is not applicable to the Company. Employees are eligible for gratuity at the time of retirement as per provisions of Payment of Gratuity Act. Provision for Gratuity has not been made in the Accounts as per AS - 15 and the same will be accounted for as and when payment is made.

m) EARNING PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

n) PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the

best estimate of the outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

o) CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks and corporations. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

p) CASH FLOW STATEMENTS :

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows.
